

SUSTAINABLE MOBILITY AND HOLIDAYS: A PERFECT MATCH

Do you want to relax, go to the seaside or to the mountain?

Do you want to enjoy culture?

Italy offers endless possibilities for your holidays: Italian and foreign tourists are always eager to discover the beauties of our wonderful country. With the e-bikes of EbikeMe, tourists will have the possibility to spend an unforgettable and smooth holiday.

LONG-TERM E-BIKE RENTAL

During holidays, let's just leave our car parked!

Art cities are chaotic and their car parks are often in the suburbs and seaside towns are very crowded. Nevertheless, we still insist on using our car during holidays because we want to park close to our destinations at any cost. And we end up losing a lot of time, stressing and the serenity of our holiday quickly fades away.

The solution? EbikeMe!

This is why EbikeMe is the right choice for hotels, holiday farms and Bed & Breakfasts that wish to offer their guests something innovative, practical and fast: e-bikes!

EbikeMe offers long-term rental of e-bikes: together with our customers we study the best customized solutions. We have the right proposal for all kind of customers, whether they be hotel chains located along the coast of the best Italian lakes and seas or small Bed & Breakfasts and holiday farms located in idyllic landscapes: we not only offer long-term rental of e-bikes, but also marketing tools and events, maintenance and the possibility to customize the e-bikes with your logo.

Relax, fun...

EbikeMe thinks also about those who wish to enjoy their e-bikes on dirt tracks, increasing the difficulty level and with a little bit of adrenaline rush. That's why we offer the Mountain Bike with Oli Move Plus motor and Shimano gear with 10 speeds, in order to go up steeper slopes and reach places that are normally reached on foot only. With our electric Mountain Bike you will have a lot of fun with little effort: once you begin to ride our e-bikes, you won't be able to do without it!

...and physical exercise!

Riding a bicycle is not only relaxing and fun, but it is also good for our physical and mental health. As the motor assistance activates only when you begin to pedal... you will always do some physical exercise, even on holiday and for short distances!

EbikeMe is waiting for you

The e-bikes of EbikeMe will be the highlight of hotels and holiday farms: whether your guests will stay 2 days or one week, they will certainly have fun on your e-bikes and will remember their holiday!

Riding an e-bike is the best choice to enjoy your holidays!

Let's see why...

The removable 420 Wh battery (which can be charged from a normal socket) of our City Bikes has a range of more than 60 kilometres per charge. Thanks to the motor you will reach the speed of 25 km/h in few seconds: in this way you will save time and energy by avoiding traffic. And during hot days... you will be refreshed in the wind! The three levels of electrical assistance will help you uphill as well and with the minimum effort you will be able to comfortably enjoy your ride among villages and hills. But let's not forget about the convenience of riding a City Bike in town, as you will be able to enter all limited traffic areas and ride through the city centre.

WHAT ARE WE WAITING FOR? LET'S ENJOY ITALY'S BEAUTIES BY CYCLING!
